

CIRCULAR ECONOMY BEST PRACTICES IN THE FURNITURE SECTOR

Product: Lilla Snåland

Why is it a success?

'From Waste to Chair' - Lilla Snåland is an upcycling stool, entirely created and designed on the concept of using waste that otherwise would be incinerated for energy production. Lilla Snåland is made using 14 pieces of waste left over from cutting the ends off the Lilla Åland (picture below) seat before it is turned.

Main results

High class products have been developed and put on the market based on the circular concepts of upcycling and upgrading.

Producer

Stolab, a Swedish furniture producer, created a new concept, New Life™, to promote ideas, projects and products that create opportunities for 'new life' by merging sustainability with growth.

Lilla Åland chair
