

CIRCULAR ECONOMY BEST PRACTICES IN THE FURNITURE SECTOR

Threespine®:

Why is it a success?

Threespine® click furniture technology by Välinge Innovation enables furniture to be assembled in seconds without using any tools.

Lessons learnt

It simplifies logistics by reducing the number of parts and opens up for efficient transportation in flat packages. It is suitable for large scale production.

Producer

Välinge Innovation is a Swedish R&D and IP company in the flooring and furniture industries. It developed the Threespine technology, a click furniture technology that makes furniture assembly easier.

Challenges

Increasing environmental concerns put new demands on furniture production and transportation. Threespine® technology enables new circular design of furniture since assembly and disassembly can be done quickly and easily. This facilitates the replacement of components, upgrades and re-manufacturing.
