

# CIRCULAR ECONOMY BEST PRACTICES IN THE FURNITURE SECTOR

## *Tiramisù (evolutionary chair):*

## *Why is it a success?*

Foppapedretti pays attention, through innovative projects, to the environment and the specific needs of babies and their parents, to make life more comfortable, while respecting the important task of parenthood. In the new Mammamia Collection, the evolving Tiramisù ash wood chair follows the growth of the child, transforming into an adult chair, pursuing the concept of product and raw material consumption savings.

## *Lessons learnt*

How to combine design, functionality and sustainability in a single product, while also ensuring durability.

## *Producer*

Foppapedretti is an Italian furniture producer, which operates in the nursery and home product sectors. The company works with wood from FSC-certified forests. Their products are appreciated for their design, durability, and sustainability.

## *Challenges*

The main challenge was to integrate in a wooden product all the features that a plastic high chair offers. Such features as fast height adjustments, enveloping and soft surfaces, mobility, different configurations.
